The Next Generation
in Catamaran Design

www.allamericanmarine.com

Aialik Voyager is a certified USCG Subchapter T 83' x 29.2' Teknicraft catamaran designed to carry 150 passengers on eco-tours departing from Seward, Alaska. The vessel will operate glacier and wildlife tours in the Kenai Fjords National Park.

The Aialik Voyager was constructed with each tour guest in mind and provides uncompromising views from two decks. The vessel is highly accessible and offers wide aisle ways, low clearance door sills, and a gradual ramp that sweeps up to the fore deck so that all passengers can easily access the

same viewing experience. The cabins are equally accommodating with tip-up Eknes seating, LCD video monitors, a high grade Bose sound system, and large viewing windows that feature a specialized fog-free defrost system. A fully equipped galley provides hot meals for each cruise.

The Aialik Voyager is hydrofoil-assisted and burns approximately the same gallons of fuel per nautical mile from 17 knots up to 27 knots with twin Caterpillar C-32 engines coupled to ZF 2500A gears and turning Osborne 5-blade propellers.
