The 'Spirit' is a 72' x 25.6' Teknicraft catamaran owned by Four Seasons Marine Services Corp. The vessel will be based in Juneau for the Alaska tourist season and will be used for eco-tour excursions. The 'Spirit' is certified to carry 150 passengers and has a fully laden cruise speed of 35 knots and a top speed of 42.5 knots.

Whether glacier, whale watching or wild life tours, with the Teknicraft design, the 'Spirit' will be fully equipped to carry passengers on full or partial day trips. The 'Spirit' is outfitted with a modest galley on the main deck and a coffee bar in the upper salon.

The 'Spirit' is powered by four Detroit Series 60 engines, each delivering 740hp at 2300rpm and drawing from two 700 gallon diesel fuel tanks. Propulsion is by four Hamilton 362 water jets.

Before being repositioned to Juneau for the summer tourist season, the 'Spirit' is being leased by Pacific International Engineering with a grant from the Washington State Department of Transportation, to conduct wake wash research between Seattle and Bremerton, through the highly wake sensitive Rich Passage.
